# Criterion F: Feedback from client

This is an English translation of an interview conducted in Turkish. The audio recording of the interview can verify its authenticity.

Questions		Yes/No	Comments
	Did the final product met your needs?	yes	Yes the program was quite enough. With the program assignment job a 7 student team did in 3 days last year was done in 30 minutes.
	Do you think the program is easy to use?	--	At first it was hard to use the program. However after using it once I don't think I will have problems in the upcoming years.
	What do you think was the best part of the program?	--	It very good to assign so many students to so many activities in so little time. Also it is very nice that it cares about student choices and student grades.
	What do you think was the worst part of the program?	--	As there were 200 students, some of the actions, at least in my computer, was slow to perform. The program also sometimes freeze for a little. In addition it is sad that the program can't perfectly assign every student in one action.
	What do you think the program lacked?	--	A loading bar during the assignment would be a very nice addition.
	Was the specific performance criteria met? 1. Information can be imported from the specified excel file 2. Settings can be changed 3. Student decisions can be force assigned 4. Some student decisions are more important 5. The algorithm properly assign students	1. Yes 2. Mostly 3. Yes 4. Yes 5. Mostly 6. Yes 7. Yes 8. Yes 9. Yes	2. I wish the settings could have been changed from the UI 3. I wish this action was a bit faster to perform 4. Sadly this caused some unexpected behavior (some algorithm assignments was unoptimal because of this property) 5. Although most students were assigned correctly, some weren't.

	6. Students can be reassigned after the algorithm is run 7. The algorithm can be run again 8. The algorithm can export results 9. Can run on client's computer		6. This feature is very good. It is very handy to reassign students not correctly assigned by the algorithm 7. This was a useless feature, never used it. 8. The Export file was enough. I wish the activities section was better. 9. It worked on my computer without problems
	Did you like the quality of my work?	--	Yes, but do know that I will contact you in the future if I have any problems.
